This month, our Research Spotlight is on a project that supports users who are Deaf and hard-of-hearing. In CREATE News: our first Race, Disability & Technology grant; two open source tools that support users of wheelchairs and strollers and blind/low vision users. Check out a couple of events happening very soon. And don’t miss the video of CREATE leaders on NSF Discovery Files.

CREATE is hiring!

CREATE seeks a Director of Strategy and Operations to join our team as a key leader to help steward this new multidisciplinary institute that involves faculty from multiple units across campus. Please share with anyone you think might be interested. Learn more and apply.

RESEARCH SPOTLIGHT

Codesigning videoconference tools for groups with mixed hearing

A team led by CREATE Ph.D. student Emma McDonnell investigated how small groups with mixed hearing statuses could be better supported during videoconferences. In a series of codesign sessions, participants reflected on experiences with captioning.

Participants sketched and discussed their ideas for technology that could help build accessible group norms, and then critiqued video prototypes that researchers created from their ideas.
McDonnell, a Ph.D. candidate in Human Centered Design & Engineering, is advised by CREATE associate director Leah Findlater. Last spring she received a Dennis Lang Award from the UW Disability Studies program.

CREATE NEWS

First Race, Disability & Technology Grant Awarded

CREATE has awarded its first Tier 1 grant for the Race, Disability & Technology initiative. The proposal, "Examining Black Experience in Accessibility Technologies," is for an interview study with people who are both Black and disabled to explore Black experience in accessibility and accessibility technologies and recognizes that assumptions of whiteness are ubiquitous in interactive technologies.

- Submitted by: Aaleyah Lewis, Ph.D. student and CREATE associate director James Fogarty, both of the UW Allen School.

The next call for proposals is for Fall 2023, with letters of intent due October 6 and invited full proposals due November 15.

Web4All recognizes CREATE open source projects

CREATE projects shone this spring at the Web4All 2023 conference. Two CREATE-funded open source projects won accolades:

**Best Technical Paper:** Understanding and Improving Drilled-Down Information Extraction from Online Data Visualizations for Screen-Reader Users
Authors include three from the Allen School: CREATE Ph.D. student Ather Sharif, student Andrew M. Zhang, CREATE faculty member Katharina Reinecke; and CREATE associate director Jacob O. Wobbrock, iSchool.

Accessibility Challenge Delegates' Award: UnlockedMaps
Congratulations again to Ather Sharif, who leads work on the app that helps commuters with wheelchairs, strollers, and bicycles in Seattle and five other cities plan their commutes without inconvenient surprises.

Dhruv Jain named SIGCHI VP for A11y

Dhruv Jain, ’22 Ph.D., UW CSE and former CREATE researcher, will oversee SIGCHI’s efforts to make conferences and publications more accessible to people with disabilities. Now a faculty member at the University of Michigan, Jain worked in the Makeability Lab and was advised by CREATE associate directors Leah Findlater and Jon Froehlich.

Wobbrock team awarded a Ten Year Technical Impact Award

CREATE associate director Jacob O. Wobbrock received the 2022 Ten Year Technical Impact Award at the ACM International Conference on Multimodal Interaction. Wobbrock and coauthors Radu-Daniel Vatavu and Lisa Anthony, were honored for their their 2012 paper titled Gestures as Point Clouds: A $P$ Recognizer for User Interface Prototypes.

PARTNER NEWS

Equitable policing app launched by former CREATE Advisory Board member

At the intersection of race and disability, the Virtual Traffic Stop (VTS) app was designed by former CREATE advisory board member Juan E. Gilbert to increase safety during traffic stops. It acts as an icebreaker between law enforcement and drivers to reduce tensions during the traffic stop.

EVENTS
Addressing the Criminalization of People with Disabilities

- Tuesday, July 25, 2023, 10 – 11 a.m.
- Register to attend

This hybrid event addresses the rights of people with disabilities to avoid needless involvement with the criminal justice system. Presented by the U.S. Department of Justice, Civil Rights Division.

AccessHack

- July 21-23, 2023
- Registration

Undergrads passionate about accessibility are invited to AccessHack to learn, collaborate, and compete while addressing real-world accessibility challenges. Former CREATE Ph.D. student Megan Hofmann is a host.

WHAT WE'RE WATCHING

CREATE Director Jennifer Mankoff and Associate Director Heather Feldner appeared recently on the CREATE-ing Access episode of National Science Foundation’s NSF Discovery Files. The two shared the center's long-term goals, some of the ongoing research, and their views of common misconceptions about disability. Give it a look and give it a like!

CREATE’s mission is to make technology accessible, and to make the world accessible through technology.
Any UW student or faculty researcher working on accessibility of or through technology can join UW CREATE:
